INRT White paper

Our crypto project requires a website to be developed on WordPress using Elementor, encompassing four main attributes: Coin Acquisition, Forex, Crypto Mining, and NFT. Below is a detailed overview of the requirements for each section.

Coin Acquisition

In the Coin Acquisition section, users will have the option to purchase our coin using various payment methods:

- **Direct Payment Methods**: Users can buy our coin using traditional payment methods such as Credit/Debit Card and UPI. This ensures that even those who are new to the crypto space can easily acquire our coin without the need for a crypto wallet.
- **Crypto Wallets**: For more seasoned crypto users, we are focusing on two major wallets, MetaMask and Trust Wallet. These wallets are widely used and trusted within the crypto community. Users can make payments using different cryptocurrencies including BTC (Bitcoin), ETH (Ethereum), FTM (Fantom), SOL (Solana), and USDT (Tether). This provides flexibility and convenience for users who may hold a variety of cryptocurrencies.

Forex

In the Forex section, users can connect their wallet and make payments through cryptocurrency. Here are the detailed steps for this process:

1. **Wallet Connection**: Users will first need to connect their crypto wallet to the website. This can be done using MetaMask, Trust Wallet, or any other supported wallet.
2. **Payment**: Once the wallet is connected, users can proceed to make a payment. The minimum payment amount is set at $1000. This ensures that the transactions are of substantial value.
3. **Virtual Card Display**: After a successful payment, a virtual card will be displayed on the screen. Note that this is a dummy virtual card and is for visual purposes only.
4. **Original Card Details**: The original card details will be sent manually via email within 24 hours from Splice. This ensures an added layer of security and verification.
5. **User Information Form**: Before making a payment, users will be required to fill out a short

form with their name, email, and mobile number. No verification is needed for this form, making the process quick and user-friendly.

Crypto Mining

The Crypto Mining section will provide users with information and tools related to crypto mining. This section should include:

- **Mining Guides**: Detailed guides on how to start mining different cryptocurrencies.
- **Mining Software**: Recommendations for trusted mining software that users can download and set up on their machines.
- **Mining Pools**: Information about joining mining pools for better efficiency and rewards.
- **Hardware Requirements**: A breakdown of the necessary hardware for optimal mining performance.
- We just need to make a user interface as the mining software is given by mining RIG corp so Need to Make a page where user need to connect wallet and make a button with caption " Start Mining " these will be customisable button where the mining RIG link is going to paste
- MOBILE mining there will be only info display about the app from App Store And Play Store any link will divert it to respective stores

NFT

The NFT section will focus on the booming NFT market and how users can get involved. This section should include:

NFT Marketplace: Integration with popular NFT marketplaces where users can buy, sell, and trade NFTs.

Minting NFTs: A guide on how users can mint their own NFTs, including step-by-step instructions and necessary tools.

NFT Storage: Information on how users can securely store their NFTs in their crypto wallets.

Latest Trends: Updates on the latest trends and popular NFTs in the market.

At Initial Stage will skip these part as need to Raise Funding For the project

By incorporating these detailed functionalities, the website will provide a comprehensive and user-friendly experience for all aspects of our crypto project.

Our crypto project requires a website to be developed on WordPress using Elementor, encompassing four main attributes: Coin Acquisition, Forex, Crypto Mining, and NFT. Below is a detailed overview of the requirements for each section.

And all the transection details should be sent to admin as its a Wordpress site so would be better to track every details

In a COIN Acquisition & FOREX section there will be small REFERRAL CODE section so if any influencer or any direct marketing employee working on it will be incentivised

NO Email No Mobile Number
Just transection ID AND Wallet aadress and REFERRAL code
